Value of NZ investments	\$3.8 billion or 17.23% of investments*
Return since inception (30 September 2003)	9.55% p.a.

Because of its weighting to growth assets, the Fund can experience large short-term movements. As a long-term investor we have a greater-than-average ability to withstand this volatility. Shifts in value from month to month must be seen in the context of the Fund's longterm purpose and performance.

Fund returns are unaudited and calculated before NZ tax and after costs. We consider tax paid as a return to the Crown.

Performance summary

- The Fund measures its performance in two ways:
 - relative to the NZ 90 day Treasury Bill rate; and
 - relative to a passive <u>Reference Portfolio</u> benchmark.

Given the investment risk of the Fund, over the long-term (rolling 20 year periods) we expect to exceed the New Zealand Treasury Bill rate by at least 2.5% p.a.
