Because of its weighting to growth assets, the Fund can experience large short-term movements. As a long-term investor we have a greater-than-average ability to withstand this volatility. Shifts in value from month to month must be seen in the context of the Fund's long-term purpose and performance.

Fund returns are unaudited and calculated before NZ tax and after costs. We consider tax paid as a return to the Crown.

<sup>\*</sup> The value given for NZ investments excludes cash and foreign exchange hedging instruments.

## **Performance summary**

- The Fund measures its performance in two ways:
  - relative to the NZ 90 day Treasury Bill return; and
  - relative to a passive <u>Reference Portfolio</u> benchmark.

Given the investment risk of the Fund, over the long-term (rolling 20 year periods) we expect to exceed the New Zealand Treasury Bill return by at least 2.5% p.a.
